

The ocean economy worldwide

Considerable global wealth

- ▶ Approximately a wealth of USD 24,000 billion in wealth, distributed as follows (1):
 - ❖ USD 7,800 billion: indirect production (tourism activities...).
 - ❖ USD 6,900 billion: direct production (fish, seaweed...).
 - ❖ USD 5,200 billion: maritime trade.
 - ❖ USD 4,300 billion: ecological impact (carbon absorption).

Considerable contributions to value and job creation

- ▶ The ocean generates a minimum USD 2,500 billion in Gross Marine Product (GMP) each year (1).
 - ❖ Two thirds of Gross Marine Product depend on a healthy ocean (1).
 - ❖ The contribution to global value creation to exceed USD 3,000 billion by 2030 (2).
- ▶ Direct full-time employment, from marine activities, may grow to 40 million jobs by 2030 (2), up from 31 million jobs in 2010 (1.5% of global employed population) (2).

The world's 14 economic powers

Source : Reviving ocean economy report

If the ocean were a country, it would be the world's 7th largest economy.

Direct employment in sea-related activities in 2010
