TOWARDS SOCIALLY SUSTAINABLE CITIES IN AFRICA

Professor Antoine Bailly
University of Geneva

RSAI – September 2012 – Rabat (Marocco)
Royal Institute for Strategic Studies (IRES)
And National Institute for Urban Planning (INAU)
Introduction

Since 1995, eleven partner cities around the world are involved in the UNESCO Programme "Management of Social Transformations" (MOST):

"Towards sustainable cities"

Including Cape Town and Nairobi in Africa

Goal: building an internationally comparable knowledge base for urban management
Why this programme?

1987 Report for the U.N. "Our common future" (Bruntland Report) "meets the needs of the present without compromising the ability of future generations…"

1991 OECD "Environmental Policies for Cities"

1993 E.U. programme "Towards sustainability…"

A new challenge for cities
An agenda for sustainable policies

The concept of sustainability:
A meaningful, but soft concept difficult to evaluate in quantitative terms

Two main ways to approach it:
- Why are some cities more livable than others?
- Why some cities have been for a long time more livable than others?

It raises the questions of:
- values
- culture
- governance
- quality of life

Why are some cities pleasant to live in? Why have they kept a positive image, sometimes over centuries? This book looks at the key components of socially sustainable urban development including: poverty, equity, globalisation and economic revitalisation; cultural diversity and social integration; land policies, housing quality and affordability; public infrastructures and urban transport; urban governance and participatory decision-making.
It considers both the theoretical basis for social sustainability, and its applications in the local policies of cities in Africa, America, and Europe. It gives concrete perspectives for socially sustainable metropolitan governance.

* * *

Prepared by the Geneva Group, leaders of the UNESCO-MOST Project on Socially Sustainable Cities between 1996-2000, the book presents contributions towards social sustainability by ten partner cities of the MOST Network (Budapest, Cape Town, Geneva, Lyon, Montreal, Nairobi, Rotterdam, Sao Paulo, San Salvador, and Toronto). It is edited by A. Bailly and R. Lawrence, professors at the University of Geneva, P. Brun and M.-C. Rey of the DAEL (Planning Department) of the Canton of Geneva, with the help of the teams of the ten partner cities, and experts and officers of the UNESCO-MOST Project.
An agenda for sustainable policies 2

Cities must now frame their short term policies to contribute to sustainable global development

Challenges for the future:

- social integration and equity
- balanced urban development
- economic restructuring and globalisation
- environmental sustainability
Fragmentation and integration in African cities

Modernity:
- individualism
- mobility
- globalisation

Exclusion:
- poverty
- segregation
- isolation

Tradition:
- solidarity
- neighborhoods
- local culture
Main issues for sustainable urban development

A way of looking at the future of our cities through:

- a new governance at the city level:
  broader scale of governance

- a social agenda:
  social equity and cultural diversity

- an integration of flows and territories:
  the integrated city

- partnership between actors (economic, political, social…):
  co-operation, culture of negociation
## Policy targets for sustainable urban development

Sustainable urban development

Challenge

Principles

Measures

Six Principles:

- Integration (social, spatial…)
- Partnership (between cities, actors…)
- Subsidiarity (democracy, community based approach)
- Economic efficiency (private, public jobs)
- Environmental efficiency (who pays for pollution, prevention…)
- Social justice

Measures:

- Legislation
- Financing conditions
- Development of know-how
Cape Town case study

- Economic development framework 1999

Five key themes for 6 municipalities (new governance)

- Poverty and homelessness
- Strengthening the economic position
- Enhancing the environment
- Building civic responsibility
- Developing local governments
